

Moonlit Lace® Viburnum

Viburnum 'sPg-3-024'

Height: 4 feet

Spread: 4 feet

Sunlight: ○ ●

Hardiness Zone: 7

Description:

A mounded and compact broadleaf evergreen shrub featuring lacy clusters of white flowers, emerging from pink buds in early spring; foliage takes on burgundy coloring in fall; an ideal specimen, border shrub, or low hedge

Ornamental Features

Moonlit Lace Viburnum features showy clusters of lightly-scented creamy white flowers at the ends of the branches from early to mid spring, which emerge from distinctive pink flower buds. It has dark green evergreen foliage which emerges light green in spring. The glossy pointy leaves turn an outstanding burgundy in the fall, which persists throughout the winter. The smooth gray bark and burgundy branches are extremely showy and add significant winter interest.

Landscape Attributes

Moonlit Lace Viburnum is a dense multi-stemmed evergreen shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Moonlit Lace Viburnum is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Moonlit Lace Viburnum will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
